Series

# 9 simple Sustainability steps for support boats

## 1 Stop the Drops!

When fueling, please fill fuel tanks slowly and use provided absorbent pads to catch drips and spills. **Don't overflow your fuel tank.** Try to leave the tank 10% empty to allow fuel to expand as it warms.

## 2 Prevent Leaks

Please **make sure your engine is well maintained** to make sure there are no oil or fuel leaks.

## 3 Slow Down

**Try to reduce fuel consumption** by turning off your boat (when safe to do so), anchoring instead of idling and reducing your speeds to a steady pace.

## 4 Leave a clean wake

Prevent marine debris.  
**Keep your trash secure on board** so it does not blow into the water.

## 5 Don't be Trashy

Keep **recycling** and waste separated on your boat to easily dispose of properly when on land.

## 6 Secure your mess

Please help **keep the boat park tidy.** Electrical tape and packaging can all blow into the water.

## 7 Help your Sailor

**Help** your sailor by carrying large volume containers of water to refill sailors' drinks bottle – avoiding single-use plastic bottles.

## 8 Do not Disturb

At the helm, please take care **not to disturb wildlife** and keep an eye out for slow moving manatees. Keep to marked channels and speed limits which are in place in areas where manatees swim.

## 9 Wash the RIB

Please **wash down your boat** with fresh water before transporting your boat to another location. This stops the spread of invasive species.

Help us protect and restore  
the waters of the world

**Thank you**
